1 Use the RAW interface in Lightroom only.

If you go onto Photoshop, open as Smart Object

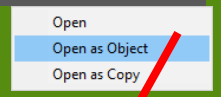

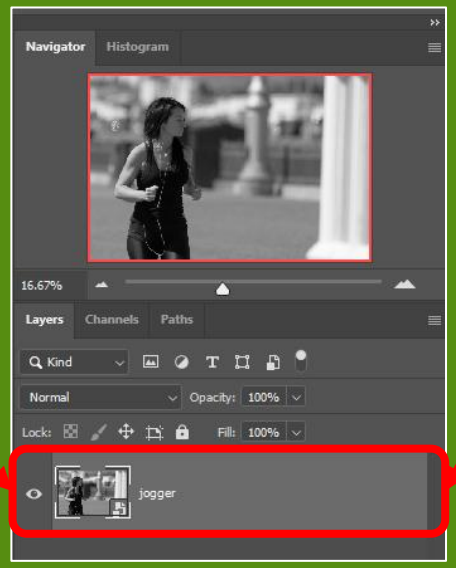

2 Open directly from desktop using Photoshop/Adobe Camera RAW

Open Photoshop. Click FILE>OPEN and locate RAW file which will open in ACR

Make adjustments in ACR
Then select 'Open as Object' in Photoshop

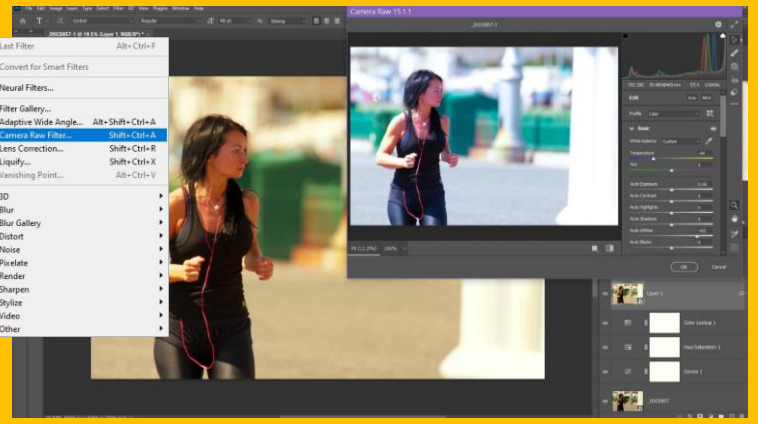

This icon indicates layer is a Smart Object

3 Open on a layer inside Photoshop while editing photo

To do this, follow these instructions:

Create a blank layer

Press Crtl+Alt+Shift+E on a PC

Press Cmd+Option+Shift+E on a Mac

This will create a 'Stamp layer' of all your adjustments to this point

Go to Menu>Layer>Smart Objects>Convert to Smart Object

Then go to Menu>Filter>Camera Raw Filter and click to open the Raw editor
